

## Zoom instructions for students to participate in Employer Connections

We are using Zoom for our Employer Connections events April 21-23. During the first meeting session, employers will share information about their organizations. The second set of meeting sessions will be your opportunity to speak directly with the employers of your choice and ask any questions. See our [website](#) for links to each session.

As you may know, there has been increased attention to the privacy aspects of using Zoom. While we cannot eliminate all the “Zoom bombing” risks associated with using this platform, we have taken steps to reduce the risk. For these sessions, we will be modeling various simple practices to help protect privacy:

- 1) Please log in with your UW NetID.
- 2) When logging in, we will automatically have everyone’s video turned off. Your video will be turned off during the first session and we encourage you to turn it on for the second session.
- 3) Everyone will be muted upon entry to eliminate any background noise that may interfere with sound. You will remain muted for the first session.
- 4) We will be recording the first session. We ask that no one take pictures and/or post pictures of either Zoom session.
- 5) We are letting you know in advance that if we experience "Zoombombing" (uninvited malicious interruptions), we will immediately remove and block that participant.
