		Total time: 3 hours, 9 minutes, 26 seconds
<i>Question</i>	<i>Response</i>	
<i>Question:</i> Program/Service Title	Prehealth Society	
<i>Question:</i> Campus Department	UWB Student Organization	
<i>Question:</i> Contact Person	Vicky Herrera	
<i>Question:</i> E-mail	vhbright@gmail.com	
<i>Question:</i> Campus Phone	+1-360-820-9848	
<i>Question:</i> Executive Summary of Your Proposal Please provide a concise overview of the program, activitiy, or service for which you seek funding.	The pre-Health Society is the first organization at the University of Washington in Bothell focused on pre-Health student. The mission of this organization is to make the road to career easier and fun by providing opportunities in volunteer work, community service, educational workshops, and much more. For our upcoming events, our club needs funding for 4 speakers (\$280), meals & transportation for speakers (\$56), and for kits that will be given in workshop such as suturing and first aid (\$60).	
<i>Question:</i> In 150 words or less, please describe the need for this program or service. Please include any data that might support your proposal (e.g., the number of students who have participated in your service or program in the past). If your program is currently funded by SAF, please indicate how you have used the money to help your organization meet its goals.	As stated before, the pre-Health Society is the first organization at the University of Washington in Bothell focused on pre-Health student. This program is very important for students attending at Bothell campus, especially if they are pursuing a career in health-related fields. Students in Seattle campus have many health-related programs to help the students attending there and we thought that Bothell students shouldn't be excluded from the same opportunity. By opening this program to	

Bothell students, we are opening opportunities that will help them stand out in applications. In addition to this, our program aims to also serve Cascadia Community College students. Based on information from the student life coordinator from Cascadia, they don't have a prehealth club established there. So, our program is also important to Cascadia. The program's service will also help Cascadia students connect to University of Washington more and make them interested in applying for school.

*Question:*

How do you plan to assess the program or service?

I plan to assess the program by getting my officers together and we will work out some kind of paperwork together to track our progress every quarter. For funding, our treasurer will definitely track that. For members, all of us will help track that. We also have Facebook to help us track our members. Our advisors will also help us determine our current program status. For instance, if it is in the right track or if there is room for big improvement. Another type of way I plan to assess the program is to send out a survey or questionnaire to our members about what they think about our program so far and ideas to improve it.

*Question:*

In 150 words or less, estimate how many currently enrolled students will likely benefit from your proposed service or program. Please estimate the number of other individuals (and indicate their affiliation) that might benefit from this service or program. Finally, please indicate other sources of financial support.

Out of the 52 members we currently have enrolled in our program, we expect all of them to likely benefit from our proposed program. This is because our program is so unique for Bothell campus and we are definitely sure that students at Bothell campus will benefit from it one way or another. We are planning to continually improve our program within time and will be able to provide our members with even bigger and better events in the future, but as long as we have enough funding to support it. As of now, we do not have any other financial support to speak of.

*Question:*

In 150 words or less, please describe the benefits that participants are likely to gain by attending or participating in this program or service.

Participants of our club will be able to gain important information regarding admission & financial aid counseling for both science-

	related graduate schools and medical school, study skills for both admission testing and prerequisite classes, research information, networking with graduate students & medical students, and skills in suturing & first aid. Our participants will definitely have an advantage in the application process for both graduate school and other health-related professional programs.
<i>Question:</i> Salary/Wages	<i>No response</i>
<i>Question:</i> Benefits *Benefits paid to regular employees working at least .50 FTE should be calculated at 32% of earnings. Benefits paid to hourly employees should be calculated at 11% of earnings.	<i>No response</i>
