Executive Summary of Your Proposal

Please provide a concise overview of the program, activity, or service for which you seek funding.

This is a joint campus UWB/CCC Earth Day Event. The event will run April 16-19th 2012 with the main event day being the 19th. It will be similar to last year's event but with more activities, speakers, and community organizations.

The department for Community Based Learning has issued me the fellowship of creating a committee, including students and faculty to put on this event.

The event includes:

- Inviting environmental speakers to educate students

- Tabling by community organization like the Friends of North Creek Forest and Friends of the Cedar River Watershed

- Tree planting in the campus wetlands

- A sustainable movie event

- Recycling awareness booths and activities

The event is not limited to these activities. As the date nears the Earth Day Planning Committee will continuously add to these activities.

Need for this Program/Service

In 150 words or less, please describe the need for this program or service. Please include any data that might support your proposal (e.g., the number of students who have participated in your service or program in the past). If your program is currently funded by SAF, please indicate how you have used the money to help your organization meet its goal(s).

This event was a great success last year! Over two hundred students were engaged and participated in learning about our environment and sustainable living practices. This is a great way to get students involved in environmental stewardship and show them that they can make a difference.

How do you plan to assess the program or service?

How do you plan to track the effects of this program or service?

For example, how would track how the event/program/service went? How would you track how successful it was and what you could change in the future?

The Earth Day Planning Committee will insure the planning and success of this event. We will be appointing coordinators to track all of the events. Based on the Sustainability Organization's records from last year we have learned a great deal of what has and has not worked. We will keep up with these records and pass them down to the future Earth Day planners to insure that this event not only continues but grows.

Estimate number of students that will benefit from your proposed program/service

In 150 words or less, estimate how many currently enrolled students will likely benefit from your proposed service or program. Please estimate the number of other individuals (and indicate their affiliation) that might benefit from this service or program. Finally, please indicate other sources of financial support.

All students that are on campus during Earth Week have the opportunity to benefit from this event. It is hard to miss considering last year we had a diversified number of environmental stewardship activities from the parking lot of UWB to the bus stop at CCC. We are seeking financial support from a number of other student organizations. The Sustainability Organization, CEB, and ASUWB are already contributing volunteers, resources, and

money to this event.

Total Amount Requested

\$2000.00

Benefits to Participants

In 150 words or less, please describe the benefits that participants are likely to gain by attending or participating in this program or service.

Students, faculty, and community members will benefit from the educational activities we plan.

They will be invited to learn about their role as environmental stewards and how to get involved.

Additional Information

Please include any other information you feel is relevant to your request. (There is no character limit on this field.)

Salary/Wages

Benefits

Benefits paid to regular employees working at least .50 FTE should be calculated at 33.4% of earnings.

Benefits paid to hourly employees should be calculated at 14.9% of earnings.

Honoraria

Facilities Rentals/Set-Ups

If you require facilities rentals/set-ups, please indicate it here.

We will require microphones, speakers with stereo equipment, and over 20 long tables.

Telecommunications

Telephone equipment should be estimated at \$35 per handset, per month (this includes only one extension).

Security

Printing & Photocopying

This event will require posters.

Transportation

Meals and Lodging for Travel

Office Supplies

Food/Refreshments

Last year we provided sustainable snacks outside Mobis Hall. This year we would like to do the same.

Equipment Rentals/Purchase

Other

Please include any other expenses that don't fall under any of the above categories.
