Executive Summary of Your Proposal

Please provide a concise overview of the program, activity, or service for which you seek funding.

I am the President of the University of Washington Men's Basketball club, and I would like to start the team back up for the new year. For the past year our basketball team has been playing in the the Puget Sound Basketball League and we would like to continue doing so until the on-campus basketball court is built.

Need for this Program/Service

In 150 words or less, please describe the need for this program or service. Please include any data that might support your proposal (e.g., the number of students who have participated in your service or program in the past). If your program is currently funded by SAF, please indicate how you have used the money to help your organization meet its goal(s).

There is a need for this club as we had a strong turn out last year, and I have had many students bugging me about the club this year. last year I would say we had about 30 different students participate throughout three different seasons. The SAF funds help our organization meet it's goals by providing funding for us to participate in a Men's Basketball league

How do you plan to assess the program or service?

How do you plan to track the effects of this program or service?

For example, how would track how the

event/program/service went? How would you track how successful it was and what you could change in the future?

I plan on tracking the success rate of this club by the feedback given by participants, and by how many wins we record.

Estimate number of students that will benefit from your proposed program/service

In 150 words or less, estimate how many currently enrolled students will likely benefit from your proposed service or program. Please estimate the number of other individuals (and indicate their affiliation) that might benefit from this service or program. Finally, please indicate other sources of financial support.

The students wanting to play basketball for the University will benefit, however, if only one team is funded there will only be 5-10 students benefiting until the sports field is constructed. Last year, we had a solid fan base of about 10-15 students, and the UWB cheerleaders came out to a few games. So, in total there were about 50 students benefited last year per season.

Benefits to Participants

In 150 words or less, please describe the benefits that participants are likely to gain by attending or participating in this program or service.

There are many benefits that participants will gain from this club. First and foremost, they will get to build life-lasting relationships with students that also go to UWB. Another major benefit is that they will live a healthier life through exercising.

Additional Information

Please include any other information you feel is relevant to your request. (There is no character limit on this field.)

From my knowledge we have had this club around for the previous 3 years or longer, so I believe it is essential for the student experience at UWB.
